Noah – we have the lab staffed and they are aware of pending sample delivery. The samples will be run tomorrow, not tonight.

Todd

Hi Todd,

Kelley is on the road for the next hour, but her colleague is on the way to the Bryn Mawr address. I think he or she will need a contact number or just to make sure someone is there to let them in.

Linda Kramer said that one of her team was going to get the other PWD samples over to you earlier and I had dropped the other set off at eurofins at about 5pm this evening.

I hope to hear results on those soon and we will await the river sample results closer to midnight.

Please let me know if you have any other questions in the meantime.

Thank you!

Noah

Hello:

Aqua's lab address is:

7 Elliot Avenue Bryn Mawr 19010 (Use GPS on phone for directions)

(this address is the parking lot for the lab. If you wind up in the front parking of the corporate office, it is OK to park there, go into the main lobby and the security guard will escort you to the lab). Once in the lab parking lot, enter the lab door and a staff member will be there to escort you to the meeting room.

If it helps, you can drop them off at our Bristol water plant and we can get them to our lab. Its address is close to the spill site

400 Radcliffe Street Bristol

Let me know what you want to do so I can coordinate with my team.

Noah -

Glad you are dropped the PWD samples.

We will send photo of COC to Eurofins in advance.

I anticipate 8 samples for Eurofins and 8 dups for Aqua.

When you have a chance we still need address of where to drop the samples for analysis by Aqua's lab.

Thanks - Kelley

Hi Kelley, I am dropping of PWDs samples at eurofins now so they can get started. When you have the samples ready can you please email a photo or scan of the CoC for eurofins to start processing the testing order? I will need to discuss how we get our name and address on the billing for the samples.

Do you know how many will be coming from epa?

Thank you!

Noah

Noah -

We are still out collecting samples. We are collecting duplicates.

EPA will be delivering the samples we collect to Eurofins in Edison NJ.

We will deliver the duplicates to Aqua for analysis at their lab. Please confirm their address and let us know point of contact.

Also - please indicate whether you or Aqua are intending to deliver the samples that the water companies collect from their intakes to Eurofins or if you want EPA to do that? It would be faster for the water company to do that and not wait for us. But we are certainly willing to transport the samples if needed.

Please email and or call me to confirm and with questions.

Thanks - Kelley

Hi Kelley,

I talked to Don and Jules at Eurofins and they suggested we fill out this COC form with the samples from today. They will be there constantly because they are sampling for another customer. I want to make sure we can get two identical samples from each location (or at least a few locations) so that one sample can go to eurofins and the other to AquaPA's lab. If the people collecting samples and filling out the COC can take a picture of it and send it to Jules Thiessen (email: Jules.Thiessen@et.eurofinsus.com) it will help expedite the analysis when the samples arrive.

I wanted to get a sample of the Baxter intake water to take up to Eurofins as well, but I am not sure how we can arrange that. I am copying Todd Duerr, who spoke with me on last night's call. I missed Linda's contact information from PWD so perhaps Todd can help us coordinate with her?

If it makes sense, I can go get a sample from PWD at the Baxter location and run the samples up to Edison now and one of your people can take the rest of the water samples up later?

Thanks very much for coordinating the river sampling.

Noah
